⭐ CONTENT ⭐

1. SHARON LIM

Ms. Sharon Lim provided insights into SAP, a German ERP software that optimizes enterprise operations across various functions like finance, HR, and customer management. SAP leverages ABAP for data processing, helping businesses integrate, analyze, and utilize data efficiently. Careers in SAP are divided into:

Functional consultants
Consultants that gather client requirements and provide training

Technical consultants
Consultants that focus on program development and implementation.

2. BRANDON TANG

Mr. Brandon Tang shared his dynamic career journey, starting as a business consultant and working across industries like telecommunications and financial services. He emphasized the value of adaptability and core skill-building, which allowed him to contribute to diverse projects, including chatbot development using Microsoft Azure, creating Power BI dashboards, and designing performance measurement tools. He also states that EY offers a platform for exploring industries and shaping career paths globally.

3. FAKRUL ARIF

Mr. Fakrul Arif shared his technical expertise in web development, highlighting tools and frameworks like HTML, CSS, JavaScript, and Node.js. His role involves developing public-sector portals, with tasks ranging from client consultations during the design phase to intensive coding during development. He emphasized the importance of staying updated with emerging technologies and credited GitHub as a valuable resource for accelerating learning and mastering coding skills.

⭐ REFLECTION ⭐

From this talk, we are inspired to

SKILL → Develop new skills — and stay updated — to ensure competitiveness.

EY's commitment to nurturing talent inspires us to embrace lifelong learning and adaptability as we prepare for careers in ICT. Insights from Sharon on SAP, Brandon's cross-industry journey, and Fakrul's web development expertise highlight how building diverse skills and exploring opportunities can unlock a world of possibilities for career success.
